

ARE YOU INVOLVED IN AQUACULTURE RESEARCH?

EIGHTH CALL

Apply for Fully EC-Funded

Access to Top-Class Research

Infrastructures with AQUAEXCEL²⁰²⁰

AQUAEXCEL²⁰²⁰ offers access to 39 top-class research infrastructures for both basic and applied research, giving aquaculture researchers (public and private, with a special focus on young researchers and SMEs) the opportunity to utilise **AQUAEXCEL²⁰²⁰'s** installations.

The **AQUAEXCEL²⁰²⁰** project regularly invites proposals from European research groups for scientific research that utilises the installations of selected participating Aquaculture Research Infrastructures.

These installations are made available to the research community for Transnational Access (TNA) with the support of the European Union's Horizon 2020 Programme.

Interested researchers can propose aquaculture research projects that:

- ✓ Involve research on any of the available fish species at the selected aquaculture research infrastructure
- ✓ Are compliant with the EATiP Strategic Research & Innovation Agenda
- ✓ Involve visits of one or two people to a research infrastructure that provides installations not available in their own country, for periods of up to three months

Access to the research infrastructures and associated travel and subsistence expenses will be paid for under the **AQUAEXCEL²⁰²⁰** project.

Please contact the facility you would like to access to discuss availability for your preferred times.

THE EIGHTH CALL FOR ACCESS IS NOW OPEN • DEADLINE FOR APPLICATIONS
